Qiang Zhang, Ph.D. Candidate

UNC/NCSU Joint Department of Biomedical Engineering
North Carolina State University
4212 Engineering Building III, 1840 Entrepreneur Dr., Raleigh, NC, USA 27606
Email: qzhang25@ncsu.edu
Phone: 412-628-4758

EDUCATION

Ph.D. in Biomedical Engineering 08/2019 - Present
North Carolina State University, Raleigh, NC, USA
Advisor: Dr. Nitin Sharma and Dr. Kang Kim
Dissertation Title: "Ultrasound Imaging Based Sensing to Measure Human Ankle Joint Effort and Assist-As-Needed Control Strategy for a Cable-Driven Ankle Neuroprosthesis"

M.S. in Mechanical Engineering 08/2017 - 08/2019
University of Pittsburgh, Pittsburgh, PA, USA
Advisor: Dr. Nitin Sharma and Dr. Kang Kim

M.S in Mechatronics Engineering 09/2014 - 07/2017
Wuhan University, Wuhan, Hubei, China
Advisor: Dr. Xiaohui Xiao and Dr. Zhao Guo
Thesis Title: "Design and Control of a Cable Driven Upper Limb Rehabilitation Exoskeleton Robot Using Series Elastic Actuator"

B.S. in Mechanical Engineering 09/2010 - 06/2014
Wuhan University, Wuhan, Hubei, China

RESEARCH INTERESTS

- Human motion intention detection
- Exoskeleton design and adaptive control
- Lyapunov-based nonlinear control
- Linear/nonlinear observer design
- Neuromuscular electrical stimulation (NMES) control
- Skeletal muscle ultrasound imaging processing
- Surface electromyography (sEMG) signal processing
- Sensor fusion with multiple sampling rate
- Human-robot interaction

RESEARCH EXPERIENCE

Research assistant (08/2019 - Present)
UNC/NCSU Joint Department of Biomedical Engineering - *North Carolina State University, Raleigh, NC*
Neuromuscular Control and Robotics Lab (Advisors: Dr. Nitin Sharma and Dr. Kang Kim)
Project: Ultrasound-based Intent Modeling and Control Framework for Neurorehabilitation (*Supported by NSF Career Award # 1750748*)

- Proposed to use surface electromyography (sEMG) and ultrasound (US) imaging feature fusion set as inputs of a modified Hill-type neuromuscular model for predicting human ankle joint net dorsiflexion and plantarflexion moment during isometric volitional contraction.
- Proposed to use the feature fusion set to predict ankle dorsiflexion motion during walking swing phase and predict net plantarflexion moment during stand phase by applying multiple machine learning approaches, including support vector machine regression, feedforward neural network, multiple linear regression, and Gaussian process regression.
- Designed and machined a cable-driven bidirectionally actuated ankle joint exoskeleton and proposed an adaptive

controller to achieve assist-as-needed control task with the consideration of ankle volitional effort predicted using neuromuscular feature fusion set.

- Proposed a virtual constrain-based ankle joint trajectory tracking during walking stand phase elicited by NMES with the consideration of plantar flexor muscles activation level measured from US imaging.
- Proposed a sampled-data observer + dynamic surface control + delay compensator frame for NMES-elicited ankle dorsiflexion trajectory tracking task, with the low rate-sampled US imaging measurement of muscle activation and fatigue feedback.
- Collaborated on model predictive control for human elbow joint trajectory tracking by NMES-elicited stimulation of antagonistic muscles including biceps brachii and triceps brachii muscles.

Research assistant (08/2017 - 08/2019)
Department of Mechanical Engineering and Materials Science - *University of Pittsburgh, Pittsburgh, PA*
Neuromuscular Control and Robotics Lab (Advisors: Dr. Nitin Sharma and Dr. Kang Kim)
Project: Ultrasound-based Intent Modeling and Control Framework for Neurorehabilitation (*Supported by NSF Career Award # 1750748*)

- Developed offline imaging processing algorithms to extract structural features, including pennation angle and fascicle length, and functional features, including echogenicity, tissue displacement, and tissue strain from skeletal muscle ultrasound imaging.
- Developed a continuous observer for a class of nonlinear neuromusculoskeletal systems with multi-rate and delayed output measurements from inertial measurement unit (IMU) and US imaging.
- Collaborated on iterative learning control development of a lower limb hybrid neuroprosthesis (NMES + powered motors) for sit-to-stand task with virtual constrain-based desired trajectory generation.

Research assistant (11/2013 – 07/2017)
School of Power and Mechanical Engineering - *Wuhan University, Wuhan, Hubei, China*
(Advisors: Dr. Xiaohui Xiao and Dr. Zhao Guo)
Project: Research on Bionic Mechanism and Optimization Design Methodology of Skeletal Muscle-like Variable Stiffness Actuator (*Supported by NSFC, No. 51605339*)

- Developed the hardware and control platform of a portable upper limb exoskeleton prototype with 4 active DOFs and 2 passive DOFs, active DOFs were actuated by series elastic actuators (SEAs) and Bowden cables.
- Based on feedback linearization control strategy, achieved SEA motion tracking control and force control, upper limb exoskeleton impedance control.

Project: Research on 4-DOFs Underactuated Bipedal Walking Robot

- Developed the hardware of an underactuated bipedal walking robot with 4 active DOFs, and established the prototype's equivalent multiple rigid link model to plan periodic stable off-line gait based on Poincáre return mapping method.
- Developed the National Instrument single board RIO-based control system of the bipedal walking robot, and programmed LabVIEW code to actuate the robot walking locomotion at a hung state in an open-loop manner.
- Collaborated on a human-inspired adaptive feedforward control strategy to stabilize the robot's underactuated bipedal waking locomotion on a compliant ground.

Project: Study on Coupling Dynamics and Gait Planning of 10-DOFs Bipedal Robot Walking on Compliant Ground (*Supported by NSFC, No. 51175383*)

- Developed a 3-D CAD model of a fully actuated bipedal walking robot with 10 DOFs and performed the key components' stress analysis based on FEA software.
- Based on zero moment point criterion, planned the walking locomotion gait of the 10 DOFs bipedal robot walking on stiff ground and performed the virtual prototype dynamic simulation in ADAMS.
- With the same walking gait, investigated the effect on kinematics and kinetics during single support phase by changing the spring stiffness added on the ankle and knee flexible joints through dynamic simulation in ADAMS.
- Developed the ground compliance model based on distributed spring-damper system and performed compliant ground-rigid robot coupling simulations to investigate the effects of ground compliance on bipedal robot dynamic properties.
- Collaborated on a real-time 3-D biped gait generation method based on minimal energy control framework to keep the 10 DOFs robot walking on compliant or uneven ground stably.

5. **Q. Zhang**, F. You, Y. Wang, et al. A Foot Module for Bipedal Walking Robot. Patent CN 203946189 U, 2014.
6. **Q. Zhang**, F. You, Y. Wang, et al. A Cross-shaped Joint Module for Bipedal Walking Robot. Patent CN 203946188 U, 2014.

AREAS OF TEACHING EXPERTISE

- Mechanical mechanism and mechanical design
- System dynamics / rigid body dynamics
- Linear control system / linear system theory
- Advanced feedback control
- Introduction to nonlinear control
- Adaptive control

TEACHING/MENTORING EXPERIENCE

- MEMS 1042: Mechanical Measurements 2 (Fall 2017, 60 students)
  - Teach and guide students to perform dynamics/control related experiments and record data
  - Review students' reports for each experiment
  - Hold office hours to address students' questions
- MEMS 1015: Rigid Body Dynamics (Spring 2018, 120 students)
  - Grade homework every week and grade midterm exam
  - Hold office hours to address students' questions
- Student Mentoring
  - David Hu (Undergraduate student, University of Pittsburgh)
  - Yao Peng (Undergraduate student, University of Pittsburgh)
  - Natalie Fragnito (Undergraduate student, North Carolina State University)
  - Jake Polar (Ph.D. student, North Carolina State University)
  - Krysten Lambeth (Ph.D. student, North Carolina State University)

COMPETITIONS

- **The 11th China Post-Graduate Electronics Design Contest.**
  The **Second Prize** of Central China Area. Jul. 2016
- **The 11th National Post-Graduate Mathematic Contest in Modeling.**
  The **First Prize** of the Nation. (2.45%) Sept. 2014
- **The 12th Asia-Pacific Robot Contest (ABU Robocon) in China Region.**
  The **Second Prize** of the Nation. (Top 16 in China) Jun. 2013

- **The 6th National College Advanced Graphic Skill Competition.**
  The **Second Prize** of Wuhan University. May 2013
- **The 5th National College Advanced Graphic Skill Competition.**
  The **Second Prize** of Wuhan University. May 2012
- **The 5th National College Mechanical Innovation Competition.**
  The **Third Prize** of Wuhan University. Apr. 2012

HONORS AND AWARDS

- The finalist for the Best Student Paper Award at the 16th IEEE/RAS-EMBS International Conference on Rehabilitation Robotics (ICORR 2019) 2019
- The First Prize of Interdisciplinary Youth Scholar Symposium, Wuhan University (Top 2) 2015
- The National Scholarship, Wuhan University (2%) 2015
- The First Level Academic Scholarship and Outstanding Student, Wuhan University (10%) 2015
- The First Prize of Post-Graduate Talent Competition, Wuhan University (5%) 2015
- The Excellent New Post-Graduate Student Award, Wuhan University (5%) 2014
- The Outstanding Graduate, Wuhan University (15%) 2014
- Two years of National Encouragement Scholarship, Wuhan University (3%) 2012, 2013
- The Second Level Scholarship and Merit Student, Wuhan University (10%) 2013
- The First Level Scholarship and Merit Student, Wuhan University (5%) 2012
- The Third Level Scholarship and Outstanding Student, Wuhan University (15%) 2011

PROFESSIONAL SKILLS

- 2-D or 3-D modeling with AutoCAD, SolidWorks, CATIA, UG, and Pro/E;
- Mechanical machining with CNC machine and 3-D printer;
- Dynamic simulation or finite element analysis with ADAMS, Matlab, and ANSYS;
- Programming with C, C#, Matlab/Simulink, and LabVIEW;
- Data processing and analyzing with SPSS, Matlab, and R;
- Human motion analysis with Vicon, Visual3D, and OpenSim;
- Other skills including MS Office, Photoshop, Visio, Dreamweaver.

PROFESSIONAL MEMBERSHIPS

- IEEE Student Member
- ASME Student Member
